

WAQAR IMTIAZ

Full Stack Developer | Team Lead | Node.js | NestJS | TypeScript | React | Angular

Multan, Pakistan | +92 347 702 8803 | hello@iwagor.com | [linkedin.com/in/iwagor](https://www.linkedin.com/in/iwagor) | github.com/wagor-imtiaz | iwagor.com

PROFESSIONAL SUMMARY

Senior software engineer with 15+ years of experience building backend services, APIs, data-driven platforms, web applications, and production systems. Strong hands-on background with Node.js, NestJS, TypeScript, REST APIs, PostgreSQL, MySQL, MongoDB, cloud deployment, CI/CD, and system integration. Experienced in team leadership, solution architecture, code reviews, API integration, database-backed workflows, and delivery across healthcare, automotive, retail, SaaS, security, and research domains.

CORE SKILLS

- **Backend Engineering:** Node.js, NestJS, Express.js, TypeScript, JavaScript, REST APIs, authentication, authorization, validation, production support
- **Databases:** PostgreSQL, MySQL, MongoDB, TypeORM, schema design, relational and NoSQL data modeling, query optimization fundamentals
- **Cloud and DevOps:** GCP Cloud Run, AWS, Azure, VPS, Docker, CI/CD pipelines, Azure DevOps, GitHub, GitLab, Bitbucket
- **Frontend:** Angular, React, Next.js, Vue.js, React Native, Tailwind CSS, Material UI, PWAs, responsive applications
- **Engineering Practices:** Software architecture, system design, code reviews, clean code, Agile/Scrum, TDD/BDD, documentation, team leadership
- **AI-Assisted Development:** 4+ years using AI-assisted development workflows; delivered multiple projects with a custom AI development workflow

PROFESSIONAL EXPERIENCE

Full Stack Developer and Frontend Lead | MatchRite Care

Remote | Aug 2023 - Present

- Lead development of patient, provider, and mobile applications, combining full-stack delivery, solution architecture, API integration, and team leadership.
- Work across NestJS, Angular, React, React Native, Tailwind CSS, and PWA architecture to deliver healthcare-focused product workflows.
- Collaborate on technical direction, reusable patterns, code quality, implementation planning, and production-ready delivery for distributed teams.

Full Stack Developer | Freelance Projects

Remote | Jun 2024 - Present

- Build backend and full-stack applications for international clients using Node.js, NestJS, TypeScript, PostgreSQL, Angular, React, and cloud deployment workflows.
- Automation Hub: developed REST APIs using NestJS and PostgreSQL for a US-based classifieds platform for cars and auto parts.
- Implemented API-driven features, database-backed workflows, deployment setup, and CI/CD support using GCP Cloud Run and related cloud tooling.
- Created advanced JavaScript file readers for XLSX, PPTX, Word, Text, CSV, TSV, and scientific file formats, integrated into Angular apps with visualization options.

Frontend Lead | Croyten LLC

Remote | Nov 2022 - Feb 2024

- Led frontend engineering for ZenBee, a sales intelligence product, with ownership of architecture, API integration, delivery quality, and team coordination.
- Worked across Angular, Node.js, Tailwind CSS, browser extensions, PWA features, responsive design, and reliable data flows with backend/API layers.

Senior Frontend Consultant | FAIR Consulting Group

Remote | Dec 2021 - Oct 2023

- Delivered UI engineering and API integration for enterprise SAP Spartacus projects including Incitec Pivot Fertilisers and Essity B2C Libra and TOM.
- Built Angular-based features using SCSS, SAP Spartacus, reusable patterns, and enterprise development workflows.

Senior Frontend Developer | True Meridian

Remote | Mar 2020 - Dec 2021

- Converted product designs into production-ready applications and integrated REST APIs across Angular, Vue, React, Next.js, SCSS, and D3.js.
- Worked on projects including Simbet and Pharma Licensing, delivering data-driven user interfaces, dashboards, and API-connected workflows.

Senior Frontend Developer | SlashNext

Lahore | Nov 2018 - Mar 2020

- Developed dashboards, browser extensions, and internal applications for a cybersecurity product using React, Vue, JavaScript, HTML, CSS, and jQuery.
- Implemented user-facing and internal product features with attention to maintainability, security-product workflows, and production usability.

Senior Frontend Developer | True Meridian

Islamabad / Hybrid | Nov 2017 - Nov 2018

- Developed a research-based product for Danone by integrating multiple data sources, building D3.js visualizations, and creating large data import workflows.
- Built Excel/CSV import flows, PDF generation features, and data visualization interfaces using Angular, React, React Native, Vue, SCSS, D3.js, and Bootstrap.

EARLIER EXPERIENCE

Full Stack Developer / Project Lead / Web Developer | Freelance, Webinane, Octocs, Zain Technologies

Remote / Multan | May 2008 - Oct 2017

- Completed 200+ freelance and startup projects globally across web applications, dashboards, custom UI components, WordPress themes, and responsive interfaces.
- Led development teams and delivery for ThemeForest products, admin dashboards, single-page applications, and client projects using JavaScript, HTML, CSS, jQuery, Vue.js, and PHP/WordPress ecosystems.
- Promoted from Web Developer to Project Manager at Zain Technologies, coordinating delivery, client communication, responsive implementation quality, and frontend production work.

SELECTED BACKEND AND FULL-STACK PROJECTS

- **Autonation Hub:** NestJS, TypeScript, PostgreSQL, REST APIs, Angular, cloud deployment, CI/CD. US-based classifieds platform for cars and auto parts.
- **MatchRite Care Portals:** Patient and provider applications with API integrations, React/Next.js/React Native delivery, solution architecture, and full-stack coordination.
- **ZenBee:** Sales intelligence product with Angular, Node.js, API integration, browser extensions, PWA features, and team leadership.
- **Scientific File Reader Platform:** JavaScript parsers for multiple document/scientific formats integrated into Angular applications with charts and data visualization.
